1. Introduction

Eco Clean Web is a scheduling, staff operations, payroll, and task-management platform designed for cleaning service businesses. It supports two primary workflows:

- Admin (desktop)
- Staff (mobile/PWA)

URL: <https://w26-4495-s2-upul-a-hrnk.vercel.app>

2. Access

Credentials

- Admin (Desktop): admin1@ecoclean.local / Password123!
- Staff (PWA): staff1@ecoclean.local / Password123!

If iOS

Follow the following instructions to install the application.

Figure 1: Installation instructions for iOS

If Android

Figure 2: Installation on Android

3. Roles

Admin:

- Manage clients, jobs, appointments
- Manage staff and payroll

Staff:

- View tasks
- Track work
- Upload notes/images
- View pay

4. Logging In

1. Open URL <https://w26-4495-s2-upul-a-hrnk.vercel.app/login>
2. Enter credentials
3. Click Login

5. Admin Guide

Dashboard

The Dashboard provides a calendar view of all appointments (Scheduled, Late, Cancelled, Completed). Admins can open appointments to view details such as notes, client info, and addresses, search using filters, and create new appointments directly on the calendar using click or drag.

- View calendar including all kinds of appointments (Scheduled, Late, Cancelled, Completed)
- Open appointments and view notes from the team members, client details, addresses, line items
- Search for appointment using filters
- Create an appointment using draw-drag/click on Calendar

The image shows a 'New Job' modal form with the following sections:

- One-off / Recurring:** Radio buttons to select the appointment type.
- Title:** A text input field with a placeholder 'Job Title'.
- Client:** A dropdown menu labeled 'Select client'.
- Client Address:** A dropdown menu labeled 'Select client first'.
- Services:** A table with columns: Name, Qty, Unit Cost, and Unit Price. It includes an 'Add Line Item' button and a description field.
- Appointments:** Fields for Date (April 11, 2026), Start (09:30 AM), and End (10:00 AM). It features an 'AI Staff Recommendation' section with a note about availability and an 'Add Appointment' button.
- Staff:** A dropdown menu labeled 'Select address, date, and time first'.
- Notes:** Fields for Note title (e.g., Gate access), Category (Select category), and Content (Enter note details). It includes an 'Add Notes' button.

Figure 3: Creating an appointment by clicking on the calendar

Figure 4: Dashboard event calendar

If you click on an Appointment/Event:

- You can edit details of the appointment including changing status of the appointment, time changes, assigned member changes and adding a note.
- Alternatively, you can drag calendar events to your desired location to reschedule according to the time/date you drop the appointment.
- Additionally, you can delete the appointment (removes from the calendar) and edit the job which the appointment belongs to. Editing the job will allow you to edit more generalized information such as title, client and address of the appointment.

Client Management

The Client Management section allows admins to view, search, and manage client records. Clicking a client opens an edit popup, while the Add Client button enables creating new clients with support for multiple properties per client.

Figure 5: Client management page

- Allows you to view (including filters to search and sort) clients.
- Edit client details popup will trigger when you click on a client record, which will allow you to edit client details.
- Add Client button will trigger the popup to add a new client. One client can have multiple properties, and you can add much as properties needed.
- The edit client popup contains the “delete” client button. Note that deleting removes the client’s visibility.
- The record of the client will remain in the system as it might be needed in case of a future reference

Figure 7: Employee/User management page

All employees are regarded as system users. The key distinction is that Staff members can perform only functions authorized for staff members. Administrator can perform operations allowed only for the administrator. (As mentioned in section 3)

Creating a user

- Creating a user will create a new user/employee as selected from the dropdown of the Add User popup.
- When creating a user, the system will assign the user a password, which must be copied and shared with the actual user.

Figure 8: System generated password/pin

Editing a user

- An admin can also rollback the “Administration” privileges of another member but change them to “Staff”.
- An admin can also reset passwords for other users.
- Deleting a user will remove their log in functionality from the entire system, while the records will remain in the system in case of a future reference.

Figure 9: Edit user popup

Staff workspace

Staff profiles include extended information such as emergency contact details, job position, and organizational relationships. Financial-related data such as TD forms and other payroll-related information can also be managed within the staff profile.

Leave Management Portal

The Leave Management Portal allows administrators to review and manage staff leave requests. Admins can view submitted requests, assess availability impacts, and approve or reject leave based on operational needs.

Figure 11: Leave management portal

Time Tracking and Timesheets Approval

This section allows administrators to monitor staff work hours and review submitted timesheets. Staff can log their working time, while admins can verify, approve, or manage timesheet entries to ensure accurate payroll processing.

Figure 12: Timesheets approval menu

6. Mobile Usage

Open the URL <https://w26-4495-s2-upul-a-hrnk.vercel.app> on your mobile device

Use the staff credentials to log in as stated in section 2.

7. PWA (Mobile App) Workflows

Navigation

All the screens on the mobile app will appear under the “3 lines” hamburger menu on the top left of the screen. Clicking on this will open the sidebar.

Figure 14: Navigation on mobile app

Tasks management

The first screen on the mobile app will show a calendar along with the tasks allocated to you.

Figure 15: Tasks Screen

Clicking on the tasks will take you to the task screen where you will find the timer which you can start and pause accordingly.

Figure 16: Task Tracking screen

Completing the task will log your time for payroll purposes.

Scrolling down in the tasks page will show your team members (if any), client details, directions to the place of the appointment, and the functionality to add a note (including images) as you perform or complete the job.

Alternatively, you can text or call the client if needed through the buttons for “message” and “call”.

Profile

The purpose of this screen is to allow staff to edit their details.

You can edit your personal details and review emergency contacts from this screen.

Additionally, there are quick navigation content in the latter part of the screen to allow you to navigate to payroll, leave and timesheet related pages.

Figure 17: Profile Screen

Entering Time

The Entering Time section allows you to review and record your daily working hours. You can check your hours for each day, make any necessary adjustments, and submit them once everything looks accurate.

Your Pay

You can also download pay stubs as pdf and compare their earnings across periods using AI insights through the “Your Pay” page

Pay (Summary & Breakdown): This screen provides a summary of your earnings, including gross pay, deductions, and net earnings. It also shows a detailed breakdown of components such as regular pay, taxes, and year-to-date totals.

Figure 19: Pay Breakdown

Pay History: The Pay History section allows you to view past pay periods and access detailed pay statements. Each entry includes the pay date, period range, and total earnings, with an option to open the full statement.

Figure 20: Pay Insights

AI Pay Insights (Optional Feature): This section allows you to compare two pay periods to understand changes in your earnings and deductions. It provides a summary and highlights key differences to help explain variations in your pay.

Note: This is an optional feature and may vary depending on availability.

Figure 21: AI Pay Insights

Earnings Distribution: This section provides a visual breakdown of your earnings, showing how your pay is distributed across regular hours, overtime, and allowances. It helps you quickly understand the composition of your income for a selected pay period.

Figure 22: Earnings Breakdown

Availability and Time Off Management

This section allows you to set your availability and request time off. You can update your working hours, mark unavailable periods, and submit leave requests, which can then be reviewed and approved by administrators.

Availability (Details & Preferences): This section provides an overview of your availability setup, including effective date and shift pattern. You can define when your availability changes take effect and customize your working preferences for each day.

Figure 23: Availability: Preferences

Availability (Weekly Shift Selection): This screen allows you to set your regular weekly availability by selecting the days and shifts (morning and/or afternoon) you can work. You can optionally add notes and save your preferences, which will be used for scheduling.

Figure 24: Availability

Time off (Schedule Overview): The Time-Off overview displays your schedule and allows you to view existing leave, check balances, and select dates from the calendar to request time off. It also confirms when leave requests are successfully submitted.

Figure 25: Time off overview

Time-Off (Balances & Requests): This screen shows your available leave balances, such as vacation and sick time, along with a history of recent requests. You can submit new time-off requests and review previously submitted ones.

Figure 26: Time off balances

8. Data Behavior

Clients and users are managed using a soft delete approach, meaning they are hidden from active views but their historical data is preserved. In contrast, appointments are permanently deleted from the system, and all related data is removed.

9. Troubleshooting

- Login fails → check credentials
- Mobile layout wrong → enable device mode
- Missing data → may be soft deleted

10. Additional AI Features

As you add a new appointment and assign staff members, the admin panel will show you AI insights when deciding what staff member to allocate. It includes a detail analysis of the staff members which is based on the last known locations, residence, travel times and availability to provide an accurate assessment.

AI Staff Recommendation
Availability, conflicts, and AI ranking for the selected slot

Summary

Larue Jacobson is recommended as the top pick because she has no leave or assignment conflicts and is immediately available for the April 9th appointment. Nakia Brekke and Verla Stiedemann are suitable alternates with no conflicts; Belinda Stanton-Lueilwitz is not recommended due to a leave conflict.

Best pick: Larue Jacobson
No leave conflicts and no overlapping assignment conflicts — immediately available for the scheduled slot.

Cautions

- Confirm local start time with the assigned staff (appointment time provided in UTC).
- Confirm travel time, parking, and entrance/access instructions for 2934 Bobbie Manors, Burnaby, BC before dispatch.
- Verify the assigned staff has required supplies and any necessary keys/gate codes prior to arrival.

Alternates

Nakia Brekke
No leave or assignment conflicts; good fallback if Larue becomes unavailable.

ALTERNATE

Verla Stiedemann
No leave or assignment conflicts; available as a secondary fallback.

ALTERNATE

Unavailable

Belinda Stanton-Lueilwitz
Leave conflict

BUSY

Figure 27: AI Task assistant for job scheduling

On the task screen, another AI overview is shown to assist the staff members on the task. This overview mainly focusses on the resources allocated for an appointment, the time, client, distance to the property and the client requirements to provide an in detailed “job plan” for the staff to perform their task efficiently.
